WHAT VALUE DOES PERFORMA 365 NIS2/DX DELIVER

The platform for digital transformation and team and employee training supports organizations at four levels:

Company level: market capabilities and competitiveness, and development of resilience to various risks (including cyber risks).

Organizational unit level (group functions): development of the company's strategic capabilities across a given number of teams with an appropriate number of people.

Team level: development of the team's strategic competencies through team training and certification.

Individual/employee level: training planning, training, testing, and verification of employee skills.

Key Obligations:

- ✓ Risk management, incident reporting, audits
- ✓ Certification and strengthening system resilience
- ✓ Threat assessments, protection plans, cooperation with authorities
